

# YOU COUNT!

**The FIQ and FIQP represent 75,000 healthcare professionals whom the health network and public can count on.**

That's why the healthcare professional-to-patient ratios are a priority—because we need a sufficient number of nurses, licensed practical nurses, respiratory therapists and clinical perfusionists to provide safe, quality, humane care.

**You count for the patients, and the government and employers should be able to count too!**
